

Water Paper 518 - Black

Wetordry abrasive sheet for controlled wet or dry sanding

Fast cutting. Smooth finishing.

3M Wetordry 518 abrasive paper is designed for wet or dry sanding where a consistent scratch pattern and smooth surface finish are required. Its silicon carbide abrasive and waterproof resin-bonded paper construction make it suitable for finishing plaster, wall putty, wood and selected metal surfaces.

WET + DRY

Flexible sanding use

SILICON CARBIDE

Sharp, fast-cutting mineral

WATERPROOF

Resin-coated paper backing

Features & Benefits

- **Sharp cutting action** Fast, consistent sanding with silicon carbide abrasive.
- **Smooth, uniform finish** Controlled scratch pattern for improved surface preparation.
- **Lower shelling on folding** Bonded construction helps the sheet hold together during hand use.
- **Good curl resistance** Waterproof backing retains shape better during wet sanding.
- **Wet or dry versatility** Use dry or with water to help reduce loading and sanding dust.

Typical Applications

Wall putty & plaster

Surface levelling and refinement before coating

Wood

Smoothing and finish preparation

Paint / primer

Surface preparation and defect refinement

Metal / aluminium

Selected finishing and repaint preparation

Product Details

Colour	Black
Abrasive mineral	Silicon carbide
Backing	Waterproof resin-bonded paper
Typical sheet size	Approx. 225 x 275 mm
Use	Wet or dry sanding

Grit selection guide

Coarse	60-150	Initial levelling
Medium	180-400	Surface smoothing
Fine	600-1200	Fine finishing
Ultra-fine	1500-2000	Final refinement
